WHY SANIGONE?

Sanitisation You Can Trust

In 2020 the world's approach to hygiene & sanitisation changed forever. Suddenly, something seen as an afterthought or "part of the housework" became a crucial part of everyday life.

After both suffering from the virus ourselves, we founded our company Sanigone to provide families and businesses with powerful antiviral and antibacterial products that you can trust to keep you, your families, pets, work colleagues and customers safe from 99.99% of viruses and pathogens.

Affordable & Easy To Use

Our powerful antiviral products require zero training/PPE to use and are at a price that won't break the bank.

Scientifically Proven, Tested & Approved

All products are certified and approved by 3 British Standards, so that you can ensure your home/workplace/dogs are sanitised

Protection For The Whole Family

We strive to create innovative antiviral products for the whole family unit, not just us humans. View our all new pet range below.

Environmentally Friendly

With a surge in plastic sanitiser bottles and PPE we're proud to say that our aerosol cans and plastic bottle are 100% recyclable

Total Release Sanitiser

Our revolutionary **TOTAL RELEASE** room disinfectant sanitiser is a 200ml aerosol which works by dispersing its entire contents in one application. It is reassuringly quick and easy to use and gives immediate protection and peace of mind to everyone that the space is clean and safe.

Each aerosol covers an area of 100m³ and lasts for up to 7 days giving you complete peace of mind. Even hard to reach places are sanitised during the process of application ensuring that you are protected.

How To Use

1. The **SANIGONE** aerosol should be shaken well before use.
2. Close all doors and windows.
3. Ensure that the area is free of people, animals and food.
4. Place the aerosol on the floor in the middle of the room to be sanitised. It is best to rest it on a small dry cloth in case of any overspill.
5. Ensure that there are no smoke alarms directly above the aerosol.
6. Press and lock the total release valve located on the top of the aerosol to activate.
7. Exit the area and close the door.
8. Avoid re-entering for at least 20 minutes and ventilate if required on re entry.
9. The high alcohol content will ensure complete evaporation leaving no sticky residue.
10. NB: Once the aerosol has been activated it cannot be stopped

Total Blast Sanitiser

Our revolutionary **TOTAL BLAST** disinfectant sanitiser spray is a 500ml aerosol which allows the user to disperse short powerful blasts of its content in to the space, onto surfaces, items and touch points that require sanitisation.

Each two to three second blast covers an area of 20m³ and ensure protection for up to 7 days giving you complete peace of mind.

Our Total Blast is perfect for sanitising areas that are more difficult to reach and can also be used as a top up for the Total Release to ensure maximum protection.

How To Use

1. Shake well before use
2. Ensure the directional spray is pointed away from the user and any other people or animals in the room
3. Press the nozzle for approximately 2-3 seconds to release a blast of the sanitiser which will cover an area of 20m³
4. As well as eliminating 99.99% of all enveloped coronaviruses, other viruses, bacteria, yeast, fungi and mould the spray delicately scents your space with pine.
